"As New York generates significantly more renewable energy, and as New Yorkers likewise increase their energy use by adopting electric vehicles and clean heating systems, ...

Energy storage installations in the United States continue to grow as the share of intermittent renewable energy generation from ...

Developer Oracle Power and CET aim to build a 1.3GW project combining solar, wind and a battery energy storage system ...

The projects, including solar power, wind power, and energy storage, were built in several locations worldwide, including the U.S., and ...

ArcelorMittal goes greener in India! New solar, wind, and energy storage projects -- totaling 1 GW -- will soon power AMNS India and reduce carbon emissions by 1.6 ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

The plan will add over 3GW of renewable capacity across 37 projects, most of which will come from solar PV, with the rest from battery ...

The New York Power Authority (NYPA) released a draft strategic plan for expanding renewable energy resources in New York State to advance the state's climate and renewable ...

All source-side energy storage projects were new energy source-side storage projects, totaling 1.003 GW/3.316 GWh, accounting ...

Enel North America has reached a 10.3 GW wind and solar portfolio and 1.1 GW of large-scale energy storage capacity.

All source-side energy storage projects were new energy source-side storage projects, totaling 1.003 GW/3.316 GWh, accounting for 35%. Among them, the newly installed ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed ...

After 3 GW of solar and storage projects have advanced, about 27 GW of solar and storage projects remain in New York's ...

New York has awarded long-term contracts for 23 utility-scale onshore wind and solar projects totaling 2.34GW of capacity that will generate more than \$4.7bn in private ...

"As New York generates significantly more renewable energy, and as New Yorkers likewise increase their energy use by adopting ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new ...

Energy storage installations in the United States continue to grow as the share of intermittent renewable energy generation from sources like solar and wind expands, ...
