How will the new US import tariffs affect battery energy storage?

The new US import tariffs, including a 10% baseline on all goods and higher rates for key trading partners, such as China, Malaysia, and Vietnam, are expected to have a significant impact on the US battery energy storage industry.

How will trump's China tariffs affect battery energy storage?

The Trump administration's China tariffs have piled atop existing and developing trade barriers on battery energy storage systems, components, and materials - destabilizing the U.S. energy storage industry.

Are Chinese tariffs affecting the battery market?

The U.S. battery market has entered a period of pricing uncertainty due to expanded battery tariffs. Starting in 2025, new Chinese tariffs on imported lithium-ion cells and components--especially those used in energy storage systems--have reached levels as high as 104%, according to updated trade filings.

How will tariff chaos affect the stationary battery energy storage industry?

Tariff chaos reigns supreme in the development of the U.S. stationary battery energy storage industry. Facing extraordinary tariffs of 145% on BESS imports into the country, developers will have to rely on inventory to realize projects. When these stockpiles are exhausted the outlook is unclear. Even the 145% tariff rate is uncertain.

The U.S. Energy Trade Dashboard provides annual, HS -10 level trade data on U.S. exports (Schedule B) and imports (HTS) of primary energy, energy equipment, and materials for ...

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and ...
