---

The Asia Pacific region is in the early stages of a transformational energy transition that requires progressive, widespread switching from fossil fuels ...

The project, which is strategically located on the Philippines" main island of Luzon, about 100km from Manila, will combine 3.5GWp of ...

In addition to large-scale projects, China is promoting distributed renewable energy systems. Rooftop solar installations are ...

"Over recent years, Hengtong has proactively developed a clean energy industrial cluster covering wind and solar power, energy ...

Asian countries are actively investing in renewables with solar, wind, offshore wind and hydro among the most utilised. The issue now facing many markets is stability. This has ...

In the last decade, we have witnessed tremendous advancements in clean energy technologies, with solar cells, wind turbines and batteries becoming more efficient and ...

It is set to be Central Asia"s first-ever grid-connected renewable energy project to include battery storage, although a timeline ...

Discover major renewable energy projects in Asia driving a sustainable future through solar, wind, and hydro power innovations ...

In India, developers are moving quickly to pair renewables with advanced storage technologies. Companies

like Envision and SUN Terra are planning multi-hundred-megawatt ...

Indonesia, Vietnam, and Thailand lead in South East Asia in terms of largest solar power projects so far driving the renewable growth The Association of Southeast Asian ...

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, ...

Pentagreen and BII invest $80M with ib vogt to accelerate greenfield solar and battery storage projects in Southeast Asia.

Headquartered in Singapore, Vena Energy is a leading renewable energy company in the Asia-Pacific region that owns, develops, constructs, operates, manages, and ...

Variable renewable energy (VRE) - solar and wind - are now among the most cost-competitive generation options and are playing an increasingly important role in the region''s power sector. ...

Gujarat has unveiled its Integrated Renewable Energy Policy 2025, charting an ambitious scale-up of renewable capacity from 41 GW to over 100 GW by 2030 while ...

These include a solar link to Indonesia, a wind connection with Vietnam, a hydropower and PV connection with Cambodia, and a hydropower link to Malaysia, with total ...

In India, developers are moving quickly to pair renewables with advanced storage technologies. Companies like Envision and SUN Terra ...

In India, developers are increasingly pairing large-scale solar and wind projects with long-duration battery storage solutions, moving beyond traditional hydro-based systems. ...
