Will Australia's first energy storage system be operational by 2026?

EnergyAustralia is actively pursuing the development of Australia's first four-hour utility-scale battery, the Wooreen Energy Storage System, with a capacity of 350 MW, set to be operational by 2026 in Victoria's Latrobe Valley. This project highlights the company's commitment to advancing energy storage solutions.

Who makes the best battery inverter in Australia?

Known for both inverters and battery solutions, Sungrow's PowerTitan and PowerStack deliver strong performance for large-scale projects. Its global supply chain strength ensures availability and support for Australian customers. A major player in lithium battery manufacturing, BYD supplies modular residential and commercial energy storage systems.

Why should you invest in energy storage in Australia?

They store solar and wind power for use during peak demand or outages, supporting grid resilience, lowering costs, and accelerating the transition to clean energy. Australia's energy storage market is experiencing strong growth due to rising electricity prices, rapid solar adoption, and increasing demand for reliable backup power.

What are the best solar power solutions in Australia?

Widely adopted across Australia, Tesla's solutions are recognized for high efficiency, scalability, and integration with solar PV systems. Known for both inverters and battery solutions, Sungrow's PowerTitan and PowerStack deliver strong performance for large-scale projects.

Our BESS systems are all-weather suited, with three different cabinet variations to suit any weather environment. With isolated output and online UPS for grid-connected applications, ...

Pre-assembled integrated BESS: Battery energy storage system equipment that is manufactured as complete, pre-assembled integrated package. The equipment is supplied in an enclosure ...
