What is an emergency lighting inverter?

An emergency lighting inverter converts DC battery power to standard AC voltages to provide backup for lighting systems in an emergency. They are commonly used with fire alarm systems, emergency lighting, exit lighting, and lighting control systems, among other critical or life safety-related equipment.

What is an assurance series emergency lighting inverter?

Assurance Series emergency lighting inverters operate LED and fluorescent fixtures during a power failure converting existing fixtures into emergency lighting.

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltage to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.

What is a UL924 rated emergency lighting inverter?

The UL924 Listed Si Series emergency lighting inverters operate LED and fluorescent fixtures with pure sinusoidal power during loss of normal AC power. The Si Series 10 to 1150 W inverters support emergency lighting for 90 minutes in accordance with life safety code requirements. All Si Inverters can be de-rated for 2 hour run time.
