Can battery energy storage systems transform business in the Philippines?

Battery Energy Storage Systems have the potential to transform how commercial and industrial companies in the Philippines manage their energy needs. With benefits ranging from cost reduction to energy supply stability, BESS is a compelling solution. While the initial investment may vary, the long-term advantages are undeniable.

Where is the first battery-based energy storage facility in the Philippines?

The plant, which will be the first battery-based energy storage facility in the Philippines, will be located next to the Masinloc power plant in Zambales. The energy storage array will enhance grid reliability by providing fast response ancillary services like frequency regulation.

Who provides fractionalized battery energy storage?

We are partnered with NexVolt, the first in the Philippines to provide fractionalized Battery Energy Storage. NexVolt, through their cutting edge technology, ensures even Small Medium Enterprises (SMEs) can adopt inexpensive battery energy storage systems and kickstart their journey towards energy independence.
