Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project ...

In contrast, all energy storage systems authorized for installation in New York must have undergone many stages of rigorous safety testing (e.g. UL certification), have required project ...

The installed capacity of new energy storage projects that were put into operation during the first half of this year in China has reached 8.63 million kilowatts, equivalent to the ...

Clean Energy Generation Program Overview Through the Clean Energy Program, DCAS works to expand distributed energy resources, including ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

Integrating storage in the electric grid, especially in areas with high energy demand, will allow clean energy to be available when and where it is most needed. New York State has some of ...

Once completed, the project will be largest battery storage installation in New York City and one of the largest in New York State, and it alone will meet one-fifth of the city's ...

Through its grid-interactive efficient building (GEB) research, DOE's Building Technologies Office seeks to build on existing energy efficiency efforts to optimize the interplay among energy ...

It oversees more than 10,000 utility accounts for city government agencies across 4,000 public buildings. It implements creative solutions to reduce energy consumption, promote energy ...

Developers of small- and utility-scale battery storage find permitting and connecting to the energy grid is an ...

U.S. power demand is surging as data centers plug in. The cheapest, fastest way to keep the lights on? Solar-plus-storage, not gas ...

vesting Billions into New or Expanded Grid Battery Manufactur America could be a Global Leader in Grid Battery Manufacturing The industry is in the process of building 25 new or expanded ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

The project is part of an audacious plan to create hydrogen, which produces no carbon dioxide when burned, and store it in caverns ...

The U.S. energy storage industry is committed to investing \$100 billion in American grid batteries, including both capital for building ...
