What happens if you put a base station in a cabinet?

Placing your Base Station in a cabinet, closet, or around dense materials (such as granite, concrete, or metal) can weaken its signal to other SimpliSafe devices. This can lead to communication errors between the Base Station and your SimpliSafe products, and cause the other devices (sensors, cameras, etc.) to become unresponsive or go offline.

Can a radio base station be installed within a building?

The proposed radio base station installation within building is certified to constitute material change in use which necessitates submission of notification to the Building Authority under BO s25.

What is a radio base station reconfiguration procedure?

This procedure outlines the application procedure to be followed by the mobile services operators (hereinafter called the "operators") for the reconfiguration of existing radio base stations NOT involving changes in the structural design and planning perspective of the parent building, and the change of land use.

Where should a base station be placed?

The Base Station should be placed in a centrally-located area within your home or business, and in an open space. It is recommended that the Base Station is elevated at least 3 feet off the ground on a non-dense surface (ideally glass or wood). The following floorplan illustrates the recommended placement for a Base Station within this layout.

3. For installation of new radio base stations and reconfiguration of existing radio base stations involving changes in the structural design and planning perspective of the parent ...
