What are LDEs projects & why do we need it?

LDES projects include pumped storage hydro, compressed air and liquid air energy storage and flow batteries. AG's Energy team looks at the detail behind the scheme proposals and how they will help decarbonise the GB electricity grid. What is long duration storage and why do we need it?

Which energy storage projects have been shortlisted for the LDEs cap & floor scheme?

Ofgem has shortlisted energy storage projects for the new LDES cap and floor scheme, featuring Li-ion BESS, flow batteries, pumped hydro and more. Ofgem has announced that 77 of the 171 submitted energy storage projects will proceed to the next stage of the LDES cap and floor scheme. Credit: T. Schneider via Shutterstock.

When will long-duration energy storage be debated?

In March 2024 the House of Lords Science and Technology Committee published a report on energy storage: 'Long-duration energy storage: Get on with it'. The report will be debated in the House of Lords on 9 January 2025. 1. What is long-duration energy storage?

Who cleared 77 long-duration energy storage projects?

Credit: T. Schneider via Shutterstock. UK energy regulator the Office of Gas and Electricity Markets (Ofgem) has cleared 77 long-duration energy storage (LDES) projects to proceed to the assessment phase of the government's LDES cap and floor scheme.

Canadian Solar secured battery supply agreements, long-term service agreements through e-Storage for two US BESS projects ...

The size, situation, and safety of UK battery energy storage systems (BESS) were among the subjects discussed at the Energy ...

Following February's excellent Energy Storage Summit at London's Victoria Park Plaza hotel and hosted by our publisher Solar Media, here's a short series of videos posing ...

We know we can't do it alone--stakeholders at every level can support the London Protocol. Citizens can share awareness and support a clean energy future Corporate citizens, ...

The UK's largest BESS projects With the UK's energy storage pipeline approaching 100GW, there is a growing number of large-capacity ...

The approved projects represent a total discharge capacity of 28.7GW and feature a range of storage technologies including lithium-ion ...

A Penso Power and Luminous Energy JV has secured planning permission for a 350MW battery storage project with five hours" ...

Ofgem has launched a cap and floor scheme to support long duration electricity storage (LDES) projects, aiming to boost renewable integration and energy security in the UK. ...

Battery storage investor-developer GSF and financial services firm Morningstar have shared outlooks for investing in BESS projects.

Statera Energy has secured debt financing for co-located storage and gas-fired flexible generation asset near London. BESS at ...

Hold onto your teacups, folks - London's energy storage plan announcement time is finally here! With the city aiming to hit net-zero emissions by 2030, this initiative could be ...

The company has offices in Boston, New York City, and Boulder, Colorado and is currently developing energy storage systems in the Greater Boston, Connecticut, and New ...

Long-duration energy storage technologies store excess power for long periods to even out the supply. In March 2024, the House of Lords Science and Technology Committee ...

Deploying 20GW of LDES could save the electricity system £24 billion between 2025 and 2050, reducing household energy bills. The reason there aren't more LDES projects ...

The size, situation, and safety of UK battery energy storage systems (BESS) were among the subjects discussed at the Energy Storage Summit 2024 held in London recently.
