Will Canberra's energy supply be future-proofed?

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched by Macquarie's Green Investment Group.

What is the Big Canberra battery project?

The Big Canberra Battery project will provide renewable energy security across the electricity grid. It will help grow the ACT's renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the territory. Building a cleaner future

How many megawatts will a battery deliver in Canberra?

The Government says the battery will deliver at least 250 megawatts of power, enough stored renewable energy to supply one-third of Canberra for two hours during peak demand.

What does the Big Canberra battery mean for Eku energy?

The Big Canberra Battery represents a significant milestone for Eku Energy as we celebrate our first GWh of battery energy storage in delivery in Australia. This brings our global portfolio of battery energy storage assets to over 4GWh.

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development ...

Eku Energy, the UK battery platform of Macquarie's Green Investment Group (GIG), has obtained development approval for a 250-MW/500-MWh battery energy storage ...

Global energy storage leader Eku Energy today announced it has achieved Financial Close for the Williamsdale Battery Energy Storage System (BESS), a significant ...

As cities transition away from fossil fuels and energy consumption increases, storing the surplus of renewable energy is becoming a more pressing challenge. The cost of ...

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra ...

Image: Potentia Energy. Potentia Energy, a joint venture co-owned by Enel Green Power and INPEX, has secured the first ...

Two BESS have been submitted to Australia's EPBC Act, totalling a potential 3,400MWh of energy storage in Queensland and New ...

The ACT Battery project in Australia will enhance the quality of supply in the city of Canberra and accelerate the country's energy ...

A 250-home "virtual big battery" was switched on in Canberra, Australia last week, allowing residents to sell solar-generated power at a significantly higher price than available to ...

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital ...

"Energy storage will play an important role in the reliability of Territory's electricity supply by providing power to help avoid blackouts during periods of high demand. The ACT ...

Samsung C& T has submitted plans for a 100MW/400MWh BESS to Australia's Environment Protection and Biodiversity ...

As with most industries treated favorably in the Inflation Reduction Act (IRA) of 2022, the domestic energy storage market was awash with new factory announcements. ...

The Inflation Reduction Act of 2022 (IRA) is the most significant climate legislation in U.S. history. IRA's provisions will finance ...

In partnership with Eku Energy, construction is underway on concrete bases for the batteries and the main switching building at ...

JinkoSolar has submitted plans for a 1,440MWh solar-plus-storage project in New South Wales to Australia's EPBC Act.

Battery energy storage systems grant us more flexibility, but there are important things to consider when ...

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in ...
