Is a Bess project 'stable' in China?

A BESS project in China deployed by Hyperstrong, the largest system integrator in the domestic market.

Image: Hyperstrong. China has reached well over 70GW of installed BESS capacity, while DC block prices appear to be 'stable', a local metals price agency said.

How much energy storage does Bess have?

Including all energy storage, its total installed capacity is now 137GW, meaning that 'new energy storage', mostly BESS, now exceeds its pumped hydro capacity. That is thanks to 43.7GW/109.8GWh of 'new energy storage' that was installed in 2024, CNESA said.

Did power China work on a Bess project in Zhangjiakou?

How much does Bess cost?

BloombergNEF recently noted a global average price for BESS (without PCS or EMS) of US\$125 per kWh, for example. Kubik suggested the tender's requirements implied it covered an AC block solution. Energy-Storage.news looked at the move towards PCS-integrated AC blocks in a recent article (Premium access).
