-----

Chile Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators. ...

Vertically-integrated solar PV company Canadian Solar has been awarded a 45MW / 45MWh battery storage project by Colombia's ...

Energy storage in larger countries in the region will also occur, but projects will be deployed first for specific applications where a ...

CFM said these solar-storage hybrid projects are pivotal to expanding and diversifying the country's renewable energy capacity.

When you think of Colombia, your mind probably jumps to aromatic coffee, emerald mountains, and vibrant culture. But here's the kicker: this South American gem is quietly ...

Colombia is making waves in renewable energy with the groundbreaking Medellin Mega Solar Energy Storage Project. This initiative combines solar power generation with cutting-edge ...

Colombia's environmental authority ANLA has granted approval for a 200 MW solar power project, marking a major step in scaling up the country's renewable energy capacity. ...

A new regulatory proposal from the Colombian government outlines the technical and commercial rules for energy storage assets. The framework targets both the national grid ...

Proposed new rules seek to provide greater flexibility for developers of renewable energy projects with storage

components.

Colombia's government has inaugurated Sol de Perij&#225;, the country's first community energy project integrating solar power and advanced battery storage, marking a ...

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medell&#237;n - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for ...

Atlas has specialized in developing, financing, constructing, and operating renewable energy projects by implementing and designing solar, wind and energy storage systems solutions ...

Would-be investors and interested stakeholders in a 50MW battery energy storage project in Colombia have been invited to respond with comments to the Energy Mining ...

Largest deployed energy storage project in North America Flexible Peaking Capacity 30 MW / 120 MWh Contract to online in 6 months Sited on 1 acre, where a power plant could not be permitted

Atlas Renewable Energy says its 201 MW solar project in Ibagu&#233; represents the company's first utility-scale installation in Colombia ...

Learn how Colombia is leading the way in renewable energy integration, overcoming challenges, and driving sustainable energy solutions for the future.

The LFP cells inside have a 15-20 year lifetime. The BESS, pictured above, has been deployed and will enter commercial operations ...

Local subsidiaries of international energy companies Engie and Canadian Solar have been among the bidders in a tender for battery ...
