-----  
Why are IP54 enclosures used as traffic control cabinets?

IP54 enclosures are commonly used as traffic control cabinets among other applications because of its superior ability to protect the electrical equipment from splashing water or rain conditions from any directions as well as protection from tampering from any solid object aside from a non-harmful deposit of dust.

What does IP54 mean?

International Protection(IP) standards are used to designate the protective capacity of an electrical enclosure. The two-digit code shows the protection against particles (the first digit) and water (the second digit). Continue reading to learn more about IP54 standards and IP54 waterproof capabilities and protection.

What finishes are available for IP54?

Continue reading to learn more about IP54 standards and IP54 waterproof capabilities and protection. Customizable metal finishes, including aluminum alloys, stainless steel, galvanized steel and carbon steel, to meet your application requirements. Finishes available include wet coat and powder coat painting, anodizing and alodining.
