What is IP55 rated fully closed rack system?

IP55 rated fully closed rack system provides safe space for IT equipments, which is noise cancelling, thermal insulated, and dust proof. Special double layer transparent front door design prevents condensate and offers status indication of IT equipments.

What is data center rack power & distribution?

Data center rack power and distribution are critical components that ensure the efficient operation of IT equipment within a data center environment. Effective data center power solutions are essential for managing the complex energy demands of various devices, from servers to storage systems.

What is a data center power system?

Data center power systems are designed to provide reliable and scalable power to equipment racks, while data center power equipment, such as power distribution units (PDUs) and uninterruptible power supplies (UPS), plays a vital role in maintaining power quality and availability.

What is IP55 rated cooling?

Various types IP55 rated cooling solution can be placed to a location that is in the row or top or built in the IT rack, removes heat and creates appropriate working temperature and humidity environment for critical IT equipments, while consumes lower energy benefiting from fully closed enclosure and hot/cold air management design.

Discover outdoor communication cabinets with IP55/IP65 rating, galvanized steel construction, and integrated cooling for telecom, 5G, and solar applications.

iLegend Prefabricated Modular Data Center meets the IP55 protection level, and adopts all-in-one design, and is prefabricated and pre-tested in the factory. To form a unit that can operate ...
