What is a 42U server rack?

A 42U rack refers to a server rack that occupies 42 units of vertical space. These racks are typically used in data centers for mounting servers and other equipment. What is the height of a 42U server rack? The height of a 42U rack is 73.5 inches (1866.3 mm), as each unit (U) is 1.75 inches (44.45 mm), and 42U is forty-two times that.

What is a 42U rack enclosure?

42U SmartRack Standard-Depth Rack Encl... 42U SmartRack Co-Location Standard-Dep... This SmartRack® 42U rack enclosure is designed for server rooms, IT closets, micro data centers, edge computing applications and other environments with essential rack-mount IT equipment.

How much power does a 42U rack use?

The power consumption of a 42U rack depends on the equipment installed within it. It varies based on the number and type of servers, networking devices, and other hardware. Power usage can range from a few hundred watts to several kilowatts, especially if high-performance servers or numerous devices are installed.

Can a 42U rack extension be used in a cabinet?

As an alternative to the 180mm rack extensions, the 42U Onyx racks also support an 85mm slim extension. The slim extension can be installed at the front or rear of the cabinet (or both front and rear). 42U racks only: The 85mm slim extension is only supported in the 42U rack cabinets, and only comes in Onyx (black) color.

The SR42UBDP is optimized for data center and other dense IT applications. Its massive front-to-rear ventilation capacity meets or exceeds server manufacturer requirements.
