What is a smart string ESS solution?

The Smart String ESS solution consists of the LUNA2000-200KWH Smart String ESS, LUNA2000-100KTL-M0 Smart Power Control System (PCS), ESC360KW-F Smart Rack Controller, and SmartACU2000D-D-05CN Smart Array Controller (SACU). Figure 1-1 Networking diagram for application scenarios in China (generation N)

What is the maximum warranty period for ESS products?

After the customer purchases the extended warranty, the maximum performance warranty period of ESSs is still 10 years. Table 2-7 describes the extended warranty service packages for C&I ESS products. 2BD-S: After approving the customer's spare parts service application, Huawei will send the replacement parts within two business days.

What is ESS & how does it work?

After the ESS is connected to the management system, the intelligent inspection function checks the health status of the PCS, identifies risks such as internal short circuits, abnormal voltage, and abnormal temperature, and generates reports. In this way, the customers can eliminate safety risks before they occur. S: Supporter.

What are the sales models for C&I ESS products?

There are two sales models for C&I ESS products: distribution by partners and direct sales by Huawei. - Distribution products: In principle, Huawei provides direct services only for value-added partners (VAPs) and remote technical support and spare parts services for end customers (installers and owners) of VAPs.

After receiving the replacement devices provided by Huawei, the customer shall pack the faulty devices using the packing materials of the replacement devices and instruct Huawei to ...

Smart Tracker Control Algorithm (SDS) is a valuable software based and closed-loop control. By using the
