UK energy regulator Ofgem has approved connection queue reforms for Great Britain's electricity grid. The change could see 65 GW of ...

Taiwan's Innovative Green Economy Roadmap (TIGER) is a two-year program with the MIT Energy Initiative, exploring ways that industry and government can promote and adopt ...

Projects are any upgrades, reinforcements, or additions that expand or enhance the transmission system in Alberta. Projects also include the connection of generation, energy ...

The new Regional Electricity Access and Battery-Energy Storage Technologies (BEST) Project -approved by the World Bank Group today for a total amount of \$465 million-- will increase ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

The risks of project delays and queue removals under NESO's evolving zonal sub-queue structure. Why grid reform could bring long-term efficiency but ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of

possible policies to encourage the cost-effective deployment of energy ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

The Tentative Decisions in Cranberry Point and Medway Grid are limited in focus to a single common legal issue: whether the Siting ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

The Department of Energy (DOE) has endorsed 11 new power projects, totaling 4,500 megawatts (MW), for System Impact Study ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

Interconnection is the complex process of connecting new electricity generators - like wind, solar, and energy storage - to the electric grid.

ESA announced successful permitting of the Salzburg Battery Storage Project, a 150MW/600MWh BESS in Midland Township, Michigan.

The UK is changing its electricity grid connection process to prioritise clean energy projects and create billions in private investment ...
