---

This report analyses the system benefits of coupling renewables with clean flexibility, with a focus on the opportunity for pairing solar electricity generation and battery ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, LCP Delta has said.

The EU is advancing several key projects and initiatives in the energy storage field to boost renewable energy integration, stabilize the grid, and support clean energy goals. These ...

"With energy storage, there's a new and interesting asset class emerging, and the business model is fundamentally different to that of wind and solar," says Ingmar Grebien, who ...

Researchers in Hungary have developed a model to calculate the optimal PV and battery storage balance to support the European grid in the next few years.

Discover the current state of energy storage companies in Europe, learn about buying and selling energy storage projects, and find ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when ...

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according to the latest European Market Outlook ...

With solar energy mainstreaming across the continent, now is the time for European decisionmakers to put batteries at the centre of a flexible, electrified, energy system.

With the solar, energy storage and e-mobility industry sectors gathering at the Intersolar event in Munich, Germany, this week, ...

Energy Storage Europe Association has published its Position Paper on Improving Permitting Procedures, highlighting the urgent need to ...

As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. ...

The European Commission says it will introduce an energy storage package in 2025, as outlined in a new report on progress by ...

With the solar, energy storage and e-mobility industry sectors gathering at the Intersolar event in Munich, Germany, this week, European solar PV trade association ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian ...

Energy Storage Summit EU 2024; the event returns this year, even bigger and better. Image: Solar Media Europe's energy storage industry and key stakeholders arrive in ...

Energy storage solutions have become an integral part of Europe's renewable energy landscape, enabling greater stability and efficiency in solar power systems.

By recognising storage systems under EU funding mechanisms and grid planning processes, the EU can unlock their full potential, not only in stabilising energy supply and maximising...
