-----

Eligible projects include the construction of storage facilities with a minimum power rating of 2 MW and a capacity of at least 4 MWh, ...

"Across Europe, more than 1,700 GW of renewable and hybrid projects are stuck in grid connection queues. Congestion - particularly in Germany - is slowing projects and ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

Investor / developer Pivot Power, technology provider W&#228;rtsil&#228;; and system optimiser Habitat Energy activated what the trio claimed to be ...

The project, whose main function will be to participate in the electricity grid regulation markets, is currently in the installation phase and ...

Danish renewables company European Energy A/S has begun construction of its first large-scale battery energy storage system (BESS) project in Denmark, seeking to install ...

The Commission's and International Energy Agency's independent assessments are that grid costs will become the main factor determining electricity bills, and that developing grids ...

The report, now in its ninth edition, compiled by the European Association for Storage of Energy (EASE) and LCP Delta tracks over 3,000 energy storage projects from over ...

The European Commission has officially launched the European Energy Storage Inventory, a real-time

dashboard for energy storage. The goal is to list all planned and operational energy ...

Renewable energy supplier and project developer Neoen has begun construction on the largest grid-connected energy storage system in mainland France, a 6MW / 6MWh ...

Trade association Energy Storage Europe (ESE) has welcomed proposed reforms to European Union (EU) grid connection and permitting processes.

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

The Commission has presented today a Guidance document on anticipatory investments for developing forward-looking electricity networks.

The Action Plan for Affordable Energy, also presented early 2025, sets out that the European Grids Package will include legislative proposals to accelerate permitting for grids, ...

This investment continues Amp's expansion into Europe which includes development and ownership of solar and wind with large-scale energy storage facilities in ...

The EU is investing in smart grid projects to ensure smooth integration of energy storage with renewables. Through digitalization initiatives funded by programs like Horizon Europe, the EU ...

The project incorporates Tesla Megapack lithium-ion batteries. Image: TagEnergy. Renewable energy developer TagEnergy has energised what it claims is the UK's largest ...

The project, whose main function will be to participate in the electricity grid regulation markets, is currently in the installation phase and is expected to be commissioned ...
