Should energy storage be regulated in Europe?

As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage Coalition urges the European Commission to develop an Action Plan on Energy Storage, providing much-needed regulatory clarity and supporting Member States in scaling up energy storage capacity.

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

Why should you join energy storage Europe Association?

Featuring in Energy Storage Europe Association's publications and events, such as the Energy Storage Global Conference, gives you visibility and the opportunity to strengthen your network among storage experts. European Commission published the Battery Booster Strategy as part of the European Automotive Action Plan.

What is energy storage Europe Association?

Energy Storage Europe Association is actively shaping the legal and R&D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process. Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research projects.

Let's face it - European energy storage regulations aren't exactly cocktail party chatter. But if you're in the renewable energy game, understanding these rules is like knowing ...
