How is a solar street light installed?

Does Geo-Technik manufacture solar street lights?

Does Geo-Technik manufacture the solar street lights itself? Yes, all of our solar street lights, brackets, and special solutions are developed and manufactured by Geo-Technik in Germany. Our in-house metalworking shop in Großkrotzenburg, Hesse, enables us to guarantee the highest quality standards and offer customized solutions for our customers.

Why should you choose a solar street light manufacturer?

Working with a solar street light manufacturer like DEL ILLUMINATION for large-scale projects offers several advantages, including access to customized lighting solutions, high-quality products, and extensive experience in project management.

How do solar street lights work?

Solar street lights work by absorbing solar energy via solar panels during the day and storing it in a LiFePo 4 or Solar AGM battery. At night, this stored energy is used to power the street lighting. Our microprocessor controls switch the lighting on automatically when it gets dark and off again at sunrise.

Further solutions are provided by systems that either direct sunlight through a mirrored light-pipe from the rooftop into interior spaces (which receive less daylight) or by solar panels, which ...
