Will Poland become a hotbed of energy storage project development?

Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars. The country built out a record 1.2 GW of onshore wind power in 2023, according to industry body WindEurope, bringing its total installed capacity to around 9.4 GW.

What is Poland doing about energy storage?

Poland has just rolled out one of Europe's most ambitious energy storage programmes- a EUR980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028.

Is the short-term outlook for energy storage in Poland good?

Whatever happens, it seems the short-term outlook for storage in Poland is good--and will only get better as the country moves to address European and national climate goals. Poland, Europe's tenth-largest economy, is set to become a hotbed of energy storage project development as the share of renewable energy on its grid soars.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

The level of energy storage interest registered during the auction was vastly greater than a year previously, when batteries made their first appearance in the contest.

When BYD Energy Storage and Portugal's Greenvolt Group inked Poland's largest-ever energy storage cabinet project in March 2025, they weren't just signing papers - they were solving a ...
