Are all energy storage facilities in the Netherlands electro-chemical?

All energy storage facilities in the Netherlands are electro-chemical, with the exception of the contracted 1 MW Hydrostar underwater compressed air energy storage project in Aruba (Caribbean). Hydrostar is a Canadian company specializing in underwater compressed air energy storage technologies.

Who is energy storage NL?

Energy Storage NL is the subject matter expert on energy storage and conversion technology. We promote awareness and knowledge about the current and future role for energy storage and conversion in the energy system. Energy Storage NL represents the broad energy storage sector towards governments and external stakeholders.

Is there a business case for energy storage in the Netherlands?

As mentioned above, there have been two major barriers, or stumbling blocks, to the business case for energy storage in the Netherlands to date. As of the beginning of 2022, one of those has been eliminated, to the great relief of GIGA Storage and others in the industry.

Why should the Netherlands accelerate the energy transition?

The Netherlands must accelerate so as not to miss opportunities. Energy storage is the missing link in the energy transition. Without large-scale deployment of batteries, heat buffers and hydrogen storage, the Netherlands risks falling behind in Europe and becoming more dependent on foreign players.

While energy storage technology is improving grid reliability in the Netherlands when the share of renewables increases.

Energy Storage NL is the trade association of the Dutch energy storage industry. Together with technology companies, knowledge institutions, grid operators and financiers, we ...
