How much does a solar battery storage system cost?

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.

How much does a solar battery cost?

The average capacity of a solar battery is around 10 kWh, meaning you'll pay anywhere from \$4,000 to \$7,500 for a typical solar battery system, not including the installation. However, you can purchase individual batteries for much smaller partial solar battery systems or larger systems for homes that need more than the average capacity.

How much does a solar battery backup cost?

Two cabinets can connect to a single inverter for up to 36 kWh total backup power. Whole-house solar battery backup costs \$20,000 to \$32,000 installed, not including solar panels. The average home uses 28 to 30 kWh per day, requiring batteries with at least that total capacity or more to power the entire home for one day.

How much does a solar battery cost in 2025?

While prices for solar batteries in 2025 range widely from around \$7,000 to \$15,000 installed, the long-term benefits can outweigh the initial expense. A battery allows you to store excess solar energy for nighttime use, reduce your reliance on the grid, and maintain power during outages.

The cost to install solar panels and a battery is \$16,200 to \$37,700 after the 30% federal tax credit. Solar battery installation is cheapest and easiest when installing the battery ...

Use this guide to budget for home solar battery costs based on factors such as system size, battery type, professional installation, storage, and more.
