How do you replace a battery?

Secure the new battery to the bracket and grease the terminals. Place the new battery in the battery tray and secure it to the bracket. Simply reverse the process you used to remove the battery from the bracket. Then, coat each of the terminals in a thin layer of lithium grease to prevent corrosion.

How to change a car battery?

Clean the terminals as part of the task of changing a car battery. Use a wire brush and a solution of baking soda and water to clean the battery tray and terminals. Dry everything completely. Do not install a car battery if there are any damp parts.

How do you remove a car battery?

Follow these steps carefully to safely remove your old car battery: Prepare your vehicle: Park on level ground, turn off the engine, remove the keys from the ignition, and engage the parking brake. Locate the battery: Open the hood and secure it with the prop rod if necessary. Locate the battery in the engine compartment.

Can you replace a car battery with a new one?

Dry everything completely. Do not install a car battery if there are any damp parts. Before you replace a car battery with the new one, remove the red and black plastic covers on the ends of the posts of the replacement. Prepare your new battery for use by installing anti-corrosion washers on both battery posts.
