Are solar panels a good investment?

Solar panel installation costs have dropped significantly in the past decade. Solar energy systems can make new homes cost more and increase a home's selling price. The expense of installing solar panels can show returns in 5-10 years with lower power bills, depending on the home's location and energy needs.

Do you need more solar panels for your home?

The larger the home, the more solar panels needed. When adding solar panels to an existing home, you can determine the customer's monthly energy consumption based on their power bills. For the most accurate estimate, divide the annual usage by 12 for the average monthly energy usage.

Should you buy a solar energy system?

If you prefer to buy your solar energy system, solar loans can lower the up-front costs of the system. In most cases, monthly loan payments are smaller than a typical energy bill, which will help you save money from the start.

How do I go solar?

Here's our quick guide to going solar. First, determine if you're a good fit based on your energy costs, home and roof setup, and location. Compare multiple quotes when going solar to find the right system at a competitive price.
