---

Statkraft's Rory Griffin writes about the development of Ireland's first 4-hour duration battery storage project, co-located with wind.

ESB has today opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability ...

Today, ESB Networks has announced that it has 1,000 MW (one Giga Watt) of electricity storage connected to Ireland's network. This figure includes 731.5 MW of battery ...

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often referred to as Bess, are regarded as a vital ...

A coal-fired plant takes a step in becoming a green energy hub that stabilizes the grid for more renewables. Discover the Moneypoint synchronous condenser Ireland with the ...

Lightsource bp has unveiled plans to establish the largest solar farm in Ireland on a sprawling 599-acre site in North Kerry. In conjunction with this massive solar farm, the project ...

ESB has officially opened a 150MW (300MWh) battery energy storage system (BESS) at its Aghada site in County Cork, marking a major milestone in Ireland's renewable ...

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often ...

The state-of-the-art facility will be the largest energy storage project in Northern Ireland and will use cutting edge Lithium-Ion technology to serve the Single Electricity Market ...

Operational since November, the battery plant is capable of providing 75 MW of energy for two hours to Ireland's electricity system. It features high-capacity batteries that store ...

ESB has opened a major battery plant at its Aghada site in Co Cork, adding 150MW in energy storage to help provide grid stability ...

A 100MW/200MWh battery energy storage system project (BESS) in Northern Ireland has been acquired by SSE Renewables.

A &#163;1 billion hydro storage project in County Antrim is set to transform Northern Ireland's energy landscape. This initiative will be the largest energy project in the region in ...

The renewable energy investment and asset management company Low Carbon and Gore Street Energy Storage Fund has switched on what is considered to be the "largest" ...

This latest battery energy storage system (BESS), currently the largest site of its kind in commercial operation in Ireland, is part of ESB's pipeline of projects which are being ...

A large lithium-ion battery storage project that contributes to grid stability and supports the integration of renewable energy, Leighton ...

If approved, construction would take around 15 months. RES" Shaneragh battery energy storage system (BESS) project is conveniently ...

The array represents a significant investment in the future of Northern Ireland's energy infrastructure and is the first step in delivering a 100 MW energy storage facility that ... siness, ...
