Should you buy a power bank or a portable charger?

Portable chargers and power banks solve (or at least put off) the problem of your phone running out of battery too quickly. However, the consequences of picking up a bad one over a good one can be much more severe than just paying more at the till. A bad power bank might not just be slow. It might be unsafe.

How much power does a power bank give a phone?

Our testing shows that a power bank can offer your phone between 70-80% of the power it contains, or more depending on the battery. It loses the rest due to the inefficiency of the power transfer. That means a 5,000 mAh battery can fully charge a phone with a 3,500 mAh battery, like an iPhone 16.

Can a power bank charge a phone?

While most power banks provide ports, some also offer built-in charging cables for commonly used devices so you won't have to carry separate charging cables. You can also find portable phone chargers that attach directly to your smartphone to automatically extend your phone's battery life.

Do you need a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. They are available in various sizes and capacities, and can include handy features such as fast charging and multiple ports.

Despite that fairly large capacity, you can fully recharge the battery pack via USB-C in as little as 56 minutes using a 100W USB-C charger. It is a bit of a chunk, however, more ...
