What types of storage cabinets are available for lithium ion batteries?

Sie sind hier: Start, Safety storage cabinets, ION-LINE, ION-LINE, Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) - fire protection from the outside-in.

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) - fire protection from the outside-in. In addition, all models of the ION-LINE offer fire resistance for more than 90 minutes when exposed to fire from the inside-out.

Where should lithium-ion batteries be stored?

Safety cabinets for lithium-ion batteries are used in many areas. Large quantities of small and medium-sized batteries are often used in commercial environments in particular, and these should normally also be stored and charged in fireproof safety storage cabinets.

Should batteries be stored in a battery safety cabinet?

If comprehensive fire protection is required for battery storage, battery safety cabinets are the right choice. On the other hand, if the focus is purely on storage and orderly charging, normal charging cabinets are sufficient. Should defective batteries be stored?
