How much does a 20 kW solar system cost?

A 20 kW solar panel system is enough to power a large home--but it'll cost you about \$55,000. Why trust EnergySage? Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change.

Do I need battery storage for a 20kW Solar System?

Whether you need battery storage for a 20kW solar system depends on your goals. If you have grid access and just want to reduce your energy bill, battery storage is optional but recommended. Incorporating battery storage into your solar system is a reliable and effective way to store surplus solar energy for later use.

What is a 20kW Solar System?

Achieve energy independence with our 20kW solar systems. Generating approximately 2,000 to 3,000 kWh of AC power a month, 20kW solar systems are ideal for large households with several EVs and huge energy demands. Choose from a selection of grid-tie and off-grid 20kW solar systems, or get in touch with our experts for a custom system!

How do you pay for a solar system?

There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA). If you can't afford to pay for your system out of pocket--or don't want to tie up that capital--solar financing allows you to spread the cost over time through a loan or lease.

Income-eligible residents and affordable housing owners can receive a customized list of energy-related assistance programs to help pay energy bills and make energy upgrades.

Learn about incentives, financing, and tips for installing solar at residential and commercial properties.
