What is Engineering Procurement & Construction (EPC)?

At RESA Power, EPC - Engineering, Procurement, and Construction - ties together seamlessly in the implementation of a complex project. At RESA Power, the engineering phase of an Engineering, Procurement, and Construction (EPC) project typically begins with the development of a conceptual design with the engineer of record.

What does an EPC contractor do?

In some cases, the EPC contractor may also be responsible for installation or assembly. The procurement phase of engineering, procurement, and construction service can be complex and time-consuming, but it is essential to ensure that a project has the resources it needs to be successful.

What types of power plants are available in Latin America?

Full turn-key power plants, both fossil and renewable energy, in 18 countries within Latin America and the Caribbean. Gas and steam turbines, conventional and heat recovery boilers, medium speed reciprocating engines, wind and hydro turbines. Natural gas, diesel, biodiesel, flare gas, heavy fuel oil, crude oil and biomass.

What is the engineering phase of an EPC project?

At RESA Power, the engineering phase of an Engineering, Procurement, and Construction (EPC) project typically begins with the development of a conceptual design with the engineer of record. This design takes into account specific equipment sizing and features, as well as any applicable regulatory requirements.

Discover how EPC contractors streamline project delivery by managing engineering, procurement, and construction under one contract.
