Why do you need a lightning protection system?

While lightning rods help protect a structure from a direct lightning strike, a complete lightning protection system is needed to help prevent harmful electrical surges and possible fires caused by lightning entering a structure via wires and pipes.

How do you protect a container home from lightning?

Proper lightning protection includes rods, grounding, and surge protection for electrical systems. For storm resistance, container homes must be anchored and reinforced to handle high winds. Regular inspections and early warning systems are crucial for maintaining safety.

What is a lightning shelter?

The Lightning Shelter provides occupants a safe environment from hazards arising through exposure to lightning.

Do you need lightning protection for gas piping?

Lightning protection may also be needed for gas piping. Any lightning protection system should follow the national safety standards and requirements of the Lightning Protection Institute, National Fire Protection Association, and Underwriters Laboratories.
