---

A major energy storage installation is advancing in California as the Sacramento Municipal Utility District prepares to launch a 160-megawatt, 640-megawatt-hour battery ...

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to ...

PORTLAND, Ore. - January 16, 2025 - GridStor, a developer and operator of utility-scale battery energy storage systems, announced today that it ...

Overview SDG& E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of ...

In the context of a Battery Energy Storage System (BESS), MW (megawatts) and MWh (megawatt-hours) are two crucial ...

More than 80 battery peakers with power storage capacities of at least 100 MW are under construction, the largest of which is AES Corp.'s 700-MW Rexford 1 Battery Storage ...

RWE continues to deliver on its Growing Green Strategy, further expanding its green energy portfolio in the U.S. with the recent completion of three new battery energy ...

The Poway City Council has approved the construction of a 300-megawatt battery energy storage system facility on 10 acres in the ...

PALM SPRINGS, Calif. -- The Bureau of Land Management today announced that construction of the Crimson Energy Storage ...

An 80-megawatt (MW) battery energy storage system is being installed at the company's Hemingway substation in Owyhee County, and ...

The 160 megawatt/320 megawatt-hour Battery Energy Storage System (BESS) is designed to improve reliability and resiliency for the Houston-area power grid, according to ...

Compass Energy Storage LLC proposes to construct, own, and operate an approximately 250-megawatt (MW) battery energy storage system (BESS) in the City of San Juan Capistrano. ...

RWE, a leading renewable energy company, continues to grow its green energy portfolio in the U.S. at a record pace. The company ...

The 100-MW Franklin Solar project will include a 60-MW four-hour duration battery energy storage system owned and operated by Idaho Power.

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California, includes 500 MW of solar and 500 MW of four-hour battery ...

With over 10.7 GW operating and in development across 16 states, Clearway's growing portfolio of paired and standalone storage contributes to grid reliability nationwide.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...
