Alpine Power Systems engineers and builds customized battery cabinets and enclosures for critical power applications, for utility, telecom, CATV, data center and other applications.

Outdoor NEMA 3R modular design easily expands and can accommodate any configuration of batteries and DC power equipment. This becomes a great alternative for substations with ...

Modular substation design Typical specifications
o Switchgear cabinets are welded to the cabin floor for structural integrity.
o Wall construction: 2.5 mm cold-rolled steel plate.
o Roof panel ...

DC supply has been widely used in substations and portable power applications for many years. The primary reason for using a DC supply in substations is to ensure a ...

Elements of DC Auxiliary System // Single-battery and charger application
The main components of the system are battery, charger and distribution switchboard including the DC system ...

A typical high-voltage industrial/utility substation DC system consists of a flooded-cell battery bank (see TB001) and a battery charger(s). Too often, too little attention is given to the proper ...

Power Solutions offers customized substation battery systems to meet the requirements of most facilities. We can help configure the entire ...
