Sun shining power "With over 300 days of sunshine annually, the Gobi Desert of Mongolia offers one of the most consistent solar environments on Earth -- proving both the reliability and ...

Inner Mongolia"s innovative solar-desert control project combats sand expansion while generating clean energy and boosting local economies, offering a model for arid regions ...

Mongolia"s first ever solar power station began operation in the Khongor soum of Darkhan-Uul province on 19th of January. A second major solar plant will be constructed near ...

Inner Mongolia, traditionally known for its coal resources, is rapidly repositioning itself as a clean energy hub. With expansive ...

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation"s ...

This ambitious project, a collaboration with the United Arab Emirates (UAE), will combine a 1,000 MW solar power plant with a 1,000 ...

China embarks on an ambitious journey to power its capital with clean energy by constructing a massive solar farm extending through ...

Jackery debuted three new products ahead of CES 2026 -- a new ultra-rugged power station, a solar-powered robot, and a solar gazebo.

Located in Ordos City, Inner Mongolia, a region renowned for its extensive wind and solar energy potential, the project is strategically ...

Welcome to Otog Front Banner in the Inner Mongolia autonomous region, a 12,200 square-kilometer county-level area where evaporation outweighs precipitation. Sand control has ...

As of now, the Inner Mongolia Autonomous Region has received approval for construction of six large-scale "Desert-Gobi-Arid" ...

LONGi Green Energy has successfully achieved full production capacity at its 5GW high-efficiency photovoltaic module project ...

The Junma solar power station -- "Junma" meaning "fine horse" in Chinese -- is part of an ambitious desert reclamation project known as the "great photovoltaic wall," ...

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation's western regions. The Asian Development ...

The project will utilize advanced battery storage to stabilize Mongolia's two isolated grid systems through peak shifting, frequency regulation, and grid balancing. This approach ...

JA said the Ulan Buh Desert Northeast New Energy Base is ultimately planned to be a 12GW solar and wind power hub in the ...

The Kubuqi Desert, China's seventh-largest, located in Inner Mongolia Autonomous Region, was once known as the "sea of death." However, it boasts abundant solar resources ...

This will be one of Mongolia's largest renewable energy procurements and the country's first solar and BESS auction. The project is designed to enhance grid reliability, ...
