For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

This manuscript provides a comprehensive overview of experimental and emerging battery technologies, focusing on their significance, challenges, and future trends. The growing ...

STATEN ISLAND, N.Y. -- Applications for 58 battery energy storage systems were approved by the NYC Department of Buildings in 2025 and another 98 are currently ...

Batteries BYD is the world's leading producer of rechargeable batteries: NiMH batteries, Lithium-ion batteries and NCM batteries. BYD owns the complete supply chain layout from mineral ...

The rapid advancement of technology and the growing need for energy storage solutions have led to unprecedented research in the field ...

Energy storage developer NineDot has announced the closing of a US\$65 million equipment financing supporting the purchase of up to 100MW/400MWh of batteries for use in ...

Batteries It can feel impossible, at least for a nonspecialist, to stay current on research into new kinds of "regular" batteries, never mind ...

The energy storage industry walked a bumpy road in 2025, but eyes are turning toward 2026's tech stack. While lithium-ion remains dominant, pressure is building for longer ...

The NSF Engine's first SuperBoost awardee, Ateios Systems, is a success story already, having received a letter of intent from a customer to supply next-generation, high ...

The US flow battery startup Quino Energy aims to repurpose old oil tanks for low cost, long duration clean energy storage.

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

On July 25, 2025, New York officially adopted updated energy storage safety codes based on the Working Group's recommendations, further ...

The Energy Department is working to develop new storage technologies to tackle this challenge -- from supporting research on battery storage at the ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

As least 15 new battery energy storage systems slated for Staten Island, data shows Published: Jan. 05, 2026, 5:50 a.m.

This means less waste, fewer new materials needed, and a stronger circular economy for batteries--something we'll need as energy ...

Climate-friendly electricity sees big battery projects soar again for 2024 A worker does checks on battery storage pods at Orsted's Eleven Mile ...
