When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest electricity generation site in New Zealand." New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

What is New Zealand's First Utility-scale battery energy storage system?

New Zealand welcomed its first utility-scale battery energy storage system earlier this year. The 35 MW/35 MWh Rotohiko battery facility commenced operation with electricity distribution company WEL Networks in April, after completing testing and commissioning.

What will Saft's 'turnkey' storage projects do for New Zealand?

The projects will even out electricity supply from hydro, wind, and solar power, and will address electricity price volatility. Saft, whose "turnkey" containers also feature power conversion and control systems, said the contract win will be the company's third utility-scale storage project to add flexibility to the New Zealand grid.

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as "the single largest ...
