---

ut how to develop their offshore wind power. From a governmental perspective, how to attract global investors to contribute their experience, expertise and financial capital to invest in ...

n Support global collaboration on energy technology to secure future energy supplies and mitigate their environmental impact, including through improved energy efficiency and development and ...

Asia's growing offshore wind ecosystem can also benefit South-east Asia. Ports in southern Taiwan, for example, may be able to ...

In the face of significant global headwinds in the sector, green shoots are emerging in 2025 for offshore wind in Asia after a turbulent 24 months.

While China currently dominates the production of offshore wind components, the broader Asia-Pacific region is scaling up. Several Asian markets are now actively developing ...

Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using ...

Under the contracts, Century Wind Power will supply 57 jackets while Century Huaxin Wind Energy, newly appointed as a Tier-1 supplier, will supply 180 pin piles, both ...

These recent developments show there is growing potential for offshore wind to deliver clean, reliable power at scale - supporting the region's economic ambitions while ...

Envision Energy has signed an agreement to supply 344.5MW wind turbines for the Quezon North Wind project, setting a ...

Countries like Australia, Vietnam, South Korea, and Japan have the potential to expand their wind energy supply chain, but they face challenges such as inconsistent policies, ...

We demonstrate that if individual states leverage their existing manufacturing capabilities to contribute to the offshore wind energy sector, this conceptual supply chain ...

In addition to promising low-cost energy, there are opportunities to localize large proportions of the solar and offshore wind supply chains required for fully operational power ...

Energy lawyers explain who produces the most wind power in Asia, China's leading role in the market and the challenges of rapidly ...

The Asia-Pacific region is central to the global energy transition, with wind power expected to more than double onshore and surpass 162 GW offshore by 2030. China and ...

The report summarizes the main findings of four project outputs, namely the Roadmap for Onshore Wind Energy Development in Indonesia, the Permitting and Regulation Assessment ...

Australia has finally opened the regulatory doors to offshore wind farms. What do we need to do to make the roll out fast and build ...

In the second chapter of our Chasing Zero series exploring the hard realities of the energy transition, we assess the major developments in Asia as the region looks to stimulate ...

In addition to promising low-cost energy, there are opportunities to localize large proportions of the solar and offshore wind ...
