-----  
Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

Will a hydro concession be granted to the illvatn pumped storage power plant?

In April 2020, the Norwegian Ministry of Energy granted Hydro concession to develop the Illvatn pumped storage power plant. An application for a plan change is currently being processed by the Norwegian Water Resources and Energy Directorate (NVE).

Is Norway a key player in the transition to a more sustainable future?

Norway's proactive approach to embracing renewable energy technologies positions it as a key player in the global transition towards a more sustainable future. In the coming years, we envision expanding our presence in Norway, collaborating with local stakeholders to harness the full potential of BESS technology.

Why should you invest in a Bess project in Norway?

The delivery process unfolded seamlessly, thanks to meticulous planning and the cooperation of all involved parties. Norway's efficiency and commitment to environmental stewardship shone through, enhancing the overall experience. Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape.

Today, the installed capacity of battery energy storage systems operating in Europe has exceeded the 20GW mark, with the ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment ...

Norway provides 30% of Europe's natural gas and will continue to be a key partner in providing reliable and secure energy to Europe. Power and hydrogen export revenue will ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a nation known for its ...

Norsk Hydro, a Norwegian aluminum and renewable energy company, is planning an 84GWh pumped storage project in Luster Municipality, Norway. The Illvatn project, with an ...

Discover all relevant Energy Storage Companies in Norway, including Gonvarri Material Handling and SN Power AS

Jinjiang 100 MWh energy storage power station projectContemporary Amperex Technology Co., Limited (CATL) is a ...

Explore cutting-edge energy storage solutions in grid-connected systems. Learn how advanced battery technologies and energy management systems are transforming renewable energy ...

Hydro plans to build a new pumped storage power plant in Luster Municipality, Norway. With construction starting in 2025 and operations beginning in 2028/2029, the total ...

Discover how Smart Senja, Norway's largest BESS installation, strengthened energy resilience for Arctic communities facing rising power demand. Learn how Arva AS, Rolls ...

Why Oslo's Energy Storage Project Is Making Headlines Let's cut to the chase: Oslo builds largest energy storage station, and it's not just another infrastructure project. This 1.2 ...

BlueVault(TM) energy storage solutions are an advanced lithium-ion battery-based solution, suited for both all-electric and hybrid energy-storage applications. BlueVault(TM) is ...

Norway, with its 83 TWh pumped storage capacity, plays a key role in managing renewable energy surpluses in Europe and stabilizing ...

Summary: Norway's latest energy storage project is setting new standards in sustainable power management. This article explores how cutting-edge battery technology and smart grid ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its extensive hydropower ...
