What is the total installed power generation capacity in India?

The total installed power generation capacity in India as on 30th September 2025 is around 501 GW, with sector wise and type wise break up as given below. For the state wise installed power generation capacity, refer to States of India by installed power capacity.

How many nuclear reactors are there in India?

As of 30 April 2025, India has 25 operational nuclear reactors with a installed capacity of 8880 MW (1.9 % of total installed capacity) accounting for around 3% of electricity generation. 10 more reactors with total capacity of 8000 MW are under construction. \$-> Retired/scrapped power stations Thermal power is the largest source of power in India.

How much power generating capacity did India add in 1Q 2025?

Installed Power Generation Capacity (MW) India added a total power generating capacity of 13,495 megawatts (MW) in 1Q 2025. Renewables accounted for 78.9% of all new capacity additions. \*Includes grid and off-grid capacities #As a % of total new capacity added: 13,495 MW With gas capacity retirement of 285 MW, the net capacity added was 13,210 MW.

What is the total electricity generation capacity in India 2022?

The total installed capacity of electricity generation as on March 31, 2022 in the state was 37,348 MW, of which the share of private sector was 59.9%, that of public sector was 34.8% and of public-private partnership ( PPP ) ( Ratnagiri Gas Power Project Ltd . ) was 5.3%.

Power generating units Many types of power generating plants are in use and possible for the future, including steam plants fueled ...

Total non-fossil fuel power capacity reached 228 GW in 1Q 2025, including contributions from hydro,
