Do solar energy installations pay for themselves?

Solar energy sales pitches often say the programs and equipment pay for themselves through lower energy bills or tax benefits. While solar energy installations can lower your energy bills, the exact savings are hard to predict. Sometimes, you have to pay for upkeep and repairs in addition to high loan payments.

How much does a solar energy system cost?

The average cost of a solar energy system is around \$16,000, which many aren't able to invest all at once. Also, as the owner of the system, you will need to pay for any necessary repairs or replacements that aren't covered by warranty. Find a network of trusted installers for your solar system, solar panels and electricity needs.

Can you get tax credits if you install solar?

Most Americans are eligible for tax credits to partially offset the cost of solar energy installations. More and more companies now deploy door-to-door salespeople to pressure homeowners to install solar energy--and to borrow money to pay for it.

Should you pay for a solar energy system with cash?

Some homeowners opt to purchase their solar energy systems with cash, forgoing the need for loans or payment plans. While this is a major investment, there are solid benefits to paying for a solar energy system with cash. Pros

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

As mentioned above, taking a loan to pay for solar panels can be a really good idea because the panels themselves generate energy bill savings that offset the cost of the loan payments. Just ...
