-----  
Can a digital substation be implemented in existing substations in Indonesia?

However, some manufacturers of the digital substation in Indonesia provide different specifications for the equipment at the same level. This condition causes challenges of implementation design of the digital substation in existing substations.

Can a super grid be a solution to electricity issues in Indonesia?

He believes that a super grid can be a solution to address electricity issues in Indonesia. This is because economic activities are still centred on Java, while NRE potentials are located on other islands. Therefore, a super grid can encourage the equal distribution of NRE electricity.

Can PLN build a digital substation in Indonesia?

Digital substation technology in Indonesia is still in development stage and there are only six pilot projects in scattered locations, hence in-depth research is needed regarding equipment requirements and the amount of investment needed by PLN to build digital substations, especially the plan for implementing digital substations in Sulawesi.

Who is responsible for grid stability and reliability in Indonesia?

Instead, the responsibility for grid stability and reliability resides with PT PLN who manage their generation assets outside the market to provide these services. Grid development and ownership: The transmission system in Indonesia is fully built, operated, and owned by PT PLN.

Indonesia Packaged Substation market currently, in 2023, has witnessed an HHI of 4306, which has increased moderately as compared to the HHI of 2102 in 2017. The market is moving ...

The uncertainty around project development in Indonesia is a challenge, frequently resulting in projects that deviate from the initial design. The investment for the Sumatra ...
