Will the government introduce a 10 gigawatt (GW) scheme?

The government on Friday said it will soon introduce a 10-gigawatt (GW) scheme for those working to build stationary, grid-scale energy storage systems. New Delhi : The government on Friday said it will soon introduce a 10- gigawatt (GW) scheme for those working to build stationary, grid-scale energy storage systems.

How long does it take to build energy storage in India?

Fast-ramping energy storage like the Delhi system can be built in a matter of months to provide critical flexibility to wherever needed on India's grid. In comparison, older technologies such as pumped hydroelectric energy storage can take years to build and are highly dependent on geographical locations.

What is India's pumped storage framework?

The ministry of power stated that the framework is aimed at facilitating investment in pumped storage infrastructure and ensuring a structured, transparent, and competitive bidding process that balances risk-sharing between stakeholders. The guidelines are expected to support India's transition towards a renewable energy-driven economy.

In May 2021, the Cabinet had approved the PLI scheme on "National Programme on Advanced Chemistry Cell (ACC) Battery Storage" for achieving manufacturing capacity of 50 ...
