-----  
What is Qatar energy's new sustainability strategy?

Qatar Energy launched a new Sustainability Strategy in January 2021 that establishes a number of targets in alignment with the goals of the Paris Agreement and sets in motion a plan to reduce greenhouse gas emissions by 25% by 2030.

Why should you choose qatarenergy LNG?

QatarEnergy LNG is committed to safety, environmental sustainability, flawless project delivery, and the reliability and efficiency of our production facilities, to play a key role in Qatar's efforts to become a global leader in the LNG industry. Click here to read QatarEnergy LNG's Direction Statement.

Who is qatarenergy LNG?

QatarEnergy LNG is a unique global energy operator in terms of size, service and reliability. We operate 14 liquefied natural gas (LNG) trains with a total annual production capacity of 77 million tonnes. This makes QatarEnergy LNG the largest LNG producer in the world.

How many liquefied natural gas trains does qatarenergy operate?

We operate 14 liquefied natural gas (LNG) trains with a total annual production capacity of 77 million tonnes. This makes QatarEnergy LNG the largest LNG producer in the world. Established in 1984, QatarEnergy LNG develops and produces hydrocarbons from the world's largest non-associated natural gas field.

Over the past three decades, Qatar has made immense socio-economic progress while retaining its unique cultural identity. In keeping pace with ...

Storage as a solution: Energy storage has emerged as one of the potential solutions to address the challenge of balancing supply and demand that arises from the ...

Explore QatarEnergy's strategic shift towards renewable energy & battery storage. Discover their investments

in solar power, global partnerships, and vision for a sustainable future.

Masdar-EWEC project combining solar and batteries to provide "round-the-clock" renewables unveiled at Abu Dhabi Sustainability ...

In 2022 Qatar's first solar power project came online, supplying the country with 7.5% of its electricity needs, with two more solar projects scheduled for completion in 2025. These will ...

Why This Desert Marvel Matters Now a football field-sized facility storing enough clean energy to power 80,000 homes during peak demand. That's the Doha new energy ...

Qatar's energy sector took giant strides this year with the launch of a slew of projects that will boost the country's production capabilities in LNG, oil, petrochemical and...

In 2020, the Qatar General Electricity and Water Corporation (KAHRAMAA) announced the complete installation of the first pilot battery energy storage units in Qatar. The ...

Over the past three decades, Qatar has made immense socio-economic progress while retaining its unique cultural identity. In keeping pace with these accomplishments, new technologies and ...

Explore the Features New Gasoline and Jet Storage Facilities in MIC Qatar Energy New Gasoline and Jet ...

The commencement of operations at Ras Laffan and Mesaieed solar power plants constitutes an important step towards ...

The success of the CCUS project is made possible through the funding from the Qatar Research Development and Innovation Council ...

Qatar is leading the Gulf's energy transformation with Battery Energy Storage Systems (BESS). Learn how BESS is reducing emissions, optimizing solar power, and modernizing the grid in ...

Notable examples include the Gemasolar concentrated solar power (CSP) project in Spain, the first commercial-scale renewable energy project in the world to use molten salt thermal ...

Well, here's the kicker: While everyone's talking about solar panel installations, the real game-changer lies in energy storage systems. Without efficient storage solutions, those shiny new ...

This project is the first of its kind in Qatar to integrate 500 kiloWatt-hours (kWh) of energy storage with the electricity grid, solar power and back-up ... Further solidifying our position in solar ...
