Could a water-based power plant benefit Santo Domingo?

A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.

Does Santo Domingo need a power plant?

The steady flow of electricity can support both tourism and Santo Domingo's innovative start-up scene. Nobel literature laureate Mario Vargas Llosa described the Dominican "appetite for noise" in his book *The Feast of the Goat*. A city that's already pulsating doesn't need any extra noise from a power plant.

Could Santo Domingo be under water by 2050?

By 2050, parts of the city could be under water. A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.

How will the SeaFloat Estrella del Mar III help Santo Domingo?

The SeaFloat Estrella del Mar III will help meet Santo Domingo's increasing demand for electricity and can support in case of power cuts - all without having to acquire precious land. The power plant has now arrived at its destination in the Caribbean and been placed in its final position on the Ozama River.

Malawi Wind and Solar Energy Storage Power Station Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is ...
