---

17 solar and storage projects launched at Appalachian coal mines, generating renewable energy and local jobs.

Repurposing abandoned coal mines into solar energy facilities could boost global solar capacity by an impressive 300 gigawatts (GW), equivalent to ...

The Nature Conservancy said that it and partner Cumberland Forest Limited Partnership have joined together with Sun Tribe Development and power producer Engie for ...

Vistra estimates it will invest over \$550 million to build the Coal to Solar & Energy Storage Act portfolio in Illinois. Pending all necessary regulatory and local approvals, Vistra intends to ...

Recently shuttered coal mines around the world can have new life as solar farms, potentially adding nearly 300 gigawatts (GW) of clean energy by 2030, a first-of-its-kind ...

The Nature Conservancy and the Cumberland Forest Limited Partnership are turning former Appalachian coal mines into clean energy hubs.

Repurposing abandoned coal mines into solar energy facilities could boost global solar capacity by an impressive 300 gigawatts (GW), equivalent to roughly 15% of current global capacity, ...

This fact sheet summarizes key considerations and approaches to support communities and developers in repurposing coal power plants to solar and storage facilities.

The Nature Conservancy and the Cumberland Forest Limited Partnership have announced new agreements with Sun Tribe Development and ENGIE to develop 14 solar ...

Coal mines that have been abandoned or will close by the end of this decade hold enough potential photovoltaic (PV) solar capacity to power a country the size of Germany for a ...

Renewable energy developers Sun Tribe Development and Engie have come together to develop 17 solar and battery energy storage systems (BESS) projects in the US on ...

The projects range from solar, microgrids, and pumped storage hydropower to geothermal and battery energy storage systems.

Recently shuttered coal mines around the world can have new life as solar farms, potentially adding nearly 300 gigawatts (GW) of clean ...

In a landmark report released this month, Global Energy Monitor reveals that converting recently closed and soon-to-be-retired coal mines into solar farms could boost ...

In a landmark report released this month, Global Energy Monitor reveals that converting recently closed and soon-to-be-retired ...

The Nature Conservancy, Sun Tribe and ENGIE will deploy solar and battery storage at former coal mine sites in the Appalachians, US.

The Nature Conservancy and the Cumberland Forest Limited Partnership have announced new agreements with Sun Tribe ...

17 former coal mines in the US are being transformed into clean energy hubs, featuring 14 solar farms and three battery storage sites.
