-----

US Solar Market Insight is a quarterly publication of Wood Mackenzie and the Solar Energy Industries Association (SEIA).

The Solar Energy Market is expected to reach 2.35 thousand gigawatt in 2025 and grow at a CAGR of 21.64% to reach 6.26 thousand ...

As renewable energy adoption accelerates globally, the energy storage system (ESS) industry chain has become the backbone of modern power grids.

This overview of the Thermal Energy Storage industry covers the segment of industry participants, customer segments, suppliers, value chain, industry concentration, competitive strategies, ...

Passage of the One Big Beautiful Bill Act (OBBBA) has fundamentally changed the policy landscape for the energy industry. Under the new law, the solar industry will no longer ...

NLR's quarterly solar industry updates provide information on trends within the solar industry. These quarterly updates cover an array of photovoltaic module and system ...

Meeting international energy and climate goals requires the global deployment of solar PV to grow on an unprecedented scale. This in turn demands a major additional expansion in ...

This report comes to you at the turning of the tide for energy storage: after two years of rising prices and supply chain disruptions, the energy storage industry is starting to see price ...

Solar is Creating Jobs and Driving Economic Growth The Interstate Renewable Energy Council (IREC) has

reported that 280,000 Americans work in solar, as of 2024. Over 10,000 solar ...

Executive Summary: Solar Energy Market Report 2025 Industry Growth Overview: The solar energy sector expanded 3.13 % last year, as per our platform data. This reflects ...

The application scenarios of the energy storage industry can be mainly divided into three categories: power supply side, grid side and user side: energy storage installed on ...

Energy storage linked to solar power is expanding fast, challenging supply chains and putting pressure on global manufacturers from China to the US. The rise of solar-plus ...

This analysis serves as a basis for highlighting several vulnerabilities and their causes in the grid energy storage supply chain to inform policy and decision makers in their efforts to increase ...

Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' efforts to ramp up production.

This overview of the battery storage industry covers the segment of industry participants, customer segments, suppliers, value chain, industry concentration, competitive strategies, ...

The IEA-PVPS 2025 Snapshot of Global PV Markets reveals a pivotal moment for solar power: global PV capacity surpassed 2.2 TW, with more than 600 GW installed in 2024 ...

Deloitte's 2026 Renewable Energy Industry Outlook indicates that amid policy changes, the industry is likely to focus on building resilience

The market for battery energy storage systems is growing rapidly. Here are the key questions for those who want to lead the way.
