What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour(kWh). Whereas the price per watt considers the solar system's size,the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system /lifetime output = cost per kilowatt hour

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161for a three-bedroom house,or \$20,412 after claiming the 30% tax credit. However,as shown in the chart below,the number of bedrooms isn't a great indicator of the size and cost of a solar system - and neither is living space,for that matter.

How much does solar installation cost?

Installation labor accounts for only 5.5-7% of total cost (\$1,375-\$2,500for average systems),while soft costs represent 40-50% of total investment: Solar costs vary significantly by location due to labor rates,permitting requirements,market competition,and local incentives.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.
