Are there any engineering quotes from the minds of innovators?

There are innumerable existing lists of similar quotes; in particular, many of the quotes in the article 101 Engineering Quotes from the Minds of Innovators align well with the ethos of the Engineering Design Studio, and appear on our list, as well. Note 1: Many of the quotes below have been altered to be gender-neutral.

Is solar energy the last energy resource that isn't owned yet?

Solar power is the last energy resource that isn't owned yet- nobody taxes the sun yet. The use of solar energy has not been opened up because the oil industry does not own the sun. The world, when you look at it, it just can't be random.

How old is the Solar System?

1,372-373. The solar system has no anxiety about its reputation. The solar system was formed 4.6 billion years ago, and the oldest fossils on Earth have been dated at about 3.8 billion years. Sometime between these two points, the chemicals of the young planet were organized into the responsive, reproducing systems we call "life."

Is solar power a good idea for writing a novel?

Solar power is going to be absolutely essential to meeting growing energy demands while staving off climate change. The process of writing a novel begins with a pang, a moment of recognition, and a situation, a character, or something you read in a paper, that seems to go off, like a solar flare inside your head. Atheism is so senseless.
