Battery energy storage systems (BESS) have emerged as a solution for mitigating the intermittent nature of solar and wind power with the rise of renewable energy. The ...

From renewables to innovative energy and urban solutions, we play our part in creating a sustainable and low-carbon future across Asia and the world.

Indonesia, Vietnam, and Thailand lead in South East Asia in terms of largest solar power projects so far driving the renewable growth ...

Partnership aims to deploy solution combining solar PV with sodium-ion batteries at commercial and industrial (C& I) sites in Southeast ...

Solartech Indonesia 2026 - ASEAN's Key Solar PV Systems Platform Solartech Indonesia is held to support government plan to achieve Net Zero Emission by featuring the largest exhibition in ...

Opportunities still exist for investors in Southeast Asia, particularly in the co-location of renewables projects with energy storage and Singapore's ongoing procurement of low-carbon ...

Recently, China Energy Construction Co., Ltd. has made another major breakthrough in the international new energy market, and successfully signed the largest EPC ...

Singapore has surpassed its 2025 energy storage deployment target, with the official opening of Southeast Asia's biggest BESS.

Much of this investment will be ploughed into solar and energy storage facilities as they will be the resources upon which South ...

As Southeast Asia accelerates its renewable energy transition, large-scale energy storage systems are becoming critical for grid stability and power management. This article explores ...

The ASEAN energy storage market is segmented by type (pumped-hydro storage, battery energy storage systems, and other ...

The report notes that Singapore already has hydropower and solar PV projects connected to Thailand and Laos, and that other ...

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for ...

Collaborations with private enterprises can lead to more effective energy storage systems and infrastructure projects, further ...

Image: ACEN. There has been an uptick in energy storage investment in Southeast Asia, a region still largely powered by coal and ...

The joint US\$80 million Development and Construction Facility ("the Facility") will finance the development and construction of solar, hybrid solar, and battery storage projects in ...

Real Southeast Asia solar storage case studies with inverters, lithium batteries, and PV systems. Discover BESS growth trends, savings up to 70%, and grid independence.

Traditional energy grids struggle to keep up, creating blackouts in cities like Manila and Jakarta. But what if the solution lies in harnessing abundant sunlight and smart storage? Solar and ...
